

Broadband Wireless

Reliable business Internet. Simplified.

Jenny Broadband Wireless delivers fast, dependable business connectivity with proactive monitoring and automatic downtime ticket creation built in. Using business-grade equipment, we detect issues early and begin resolving them quickly, reducing downtime and removing the need for you to manually log support tickets.

Why choose Jenny Broadband Wireless?

- Uncapped and unthrottled
- Speeds from 10Mbps to 500Mbps
- Automatic downtime detection
- Escalated support process
- Local dealer support
- Low contention
- Backup power on all towers for load-shedding resilience

Built for business

Designed for stable, consistent performance, Jenny Broadband Wireless keeps your business connected without the delays and limitations of fibre rollout. It is ideal for cloud applications, voice, video, and other critical business operations.

What's included

- 1 static public routable IP address
- 150 free email addresses
- Additional IPs and email accounts available on request

Support you can rely on

Jenny Internet offers reliable 7-day support, including public holidays, so help is always available when needed. Whether through our call centre or chat assistant, you can count on fast, effective assistance to minimise downtime and keep your business connected.
