

Secure Backup

Off-site backup that runs itself.

Jenny Secure Backup protects your business against data loss from theft, hardware failure or simple accident. Your data is encrypted, password protected and stored continuously across two separate data centres.

Why choose Jenny Secure Backup?

- Continuous automatic backup. Nothing for staff to remember
- Stored in two separate data centres
- Encrypted and password protected
- Off-site by design, so one disaster cannot take everything
- Handled in line with data protection law in your market
- Easy setup with full support throughout
- One-month free trial

Built for business

Ransomware, a failed server, a stolen laptop or an employee who deleted more than they should have. Every one of these is survivable with a current off-site backup and close to fatal without one. The cost is measured against a single bad afternoon.

What's included

- Continuous off-site backup of your selected data
- Replication across two separate data centres
- Encryption and password protection
- Full support during setup and ongoing use

Support you can rely on

7-day support, including public holidays, through our call centre, chat assistant and website. Expert assistance from activation onwards.
